Confirmation of Directives 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS)

Dear sirs and madames,

Directive 2002/95/EC of 27 January 2003 (RoHS) has banned prohibited substances from being placed on the market for new electrical and electronic equipment since 1 July 2006.

Directive 2011/65/EU of June 8, 2011 and its amendments recasts the above-mentioned directive.

Our products do not contain any substances in concentrations whose placing on the market is prohibited according to the currently applicable requirements under Directive 2011/65/EU and its delegated Directive (EU) 2015/863 of March 31, 2015. We confirm this based on information provided to us by our suppliers and based on independent investigations.

For further questions please contact your known contact person at Cherry Europe GmbH and our quality management team.

Best regards,

Cherry Europe GmbH
